THE REVISION OF THE BIBLE.

The Rev. Dr. Philip Schaff, President of the Revision Committee, addressed at the lecture room of the First Presbyterian Church a large and intellizent audience, on the subject of the proposed revision of the Bible. The proposition is simply to revise the existing texts of the Bible, following that of James I, of England mainly, but availing themselves of all learning concerning the subject from any source. It is not intended to charge the character of the Bible but by judicious changes of words and phrases give the real meaning of the original. To this end a committee of learned Theologians and scholars in England, America, Germany, France, and in all nations where there are Christians who believe in the Tripity, have organized in two divisions, one in Great Britale and one in America, to do this work. This great work has now been going

on ten years. The Rev. Dr. Schaff was born in Switzerland, closed his studies in Europe in 1841, and emigrated to America where he was appointed a professor is Theology. At the age of 37 he pub. lished "The Principles of Protestantism." and afterwards a "History of the Apostolic Church," "History, of the Christian Church, from the birth of Christ to the Reign of Constantine," "The Person of Christ, the Miracle of History." and many other works. He is now Professor in the Union Theological Seminary in New York City. Dr. Schaff's learning is mayvelous, especially-in sacred literature and Theology, and his fame is world wide.

As to the observations of Dr. Schaff to the audience, they were the recounting of the translations already made and comments. The first translation made in England was in the Saxon tongue, and the next in Norman French. Then came the Caxtons, Tyndail's edition and one or two others, before King James'. He showed also how words did not mean the same thing in one age as in another, citing examples. He stated that the New Testament would be printed as revised next February, printed in England by the Uxford and Cambridge University presser, The American revisors have given their time and labor without compensation for eight years. Dr. Schoff issues a private circular, from which we take the liberty of copying an extract, stating how any one who desires it, can get the edition of the New Testament which appears in February. Those persons ho desire to avail themselves of this advantage can follow the directions

It is announced that a Court Martin n the case of Cadet Whittaker has been ordered to convene at West Point on Tuesday, January 18th. Brig. Gen. Nelson A. Miles is to be President of the Court, with the following other members: Col. A. S. Morrow, 21st Infautry; Lieut. Col. Pinckney Lugenbal, 1st Infantry: Lieut. Col. J. M. Bannin 1st Artillery; Maj. Lewis Merrill, 7th Cavalry; Maj. E. B. Lumner, 5th Cavalry; Capt. R. Q. Frank, 1st Artillery; Capt. J. N. Craig, 10th Infantry; Capt. Merritt Barbes, 16th Infantry; Msj. A. B. Gardner, Judge Advocate of the

It is understood that the President consulted Gen. Howard in regard to the Court Martial, and that he was desirous that immediate action should be taken before he entered on his duties at West Point, as he did not desire to be embarrassed by the case. Whittaker will be regularly tried under the articles of war and the rules of the army, and on charges and specifications. It is to be provided in the order creating have had less "blood letting" in the the Court that at least a majority of the members of the Court shall not be graduates of the military academy at West Point. Also in case of acquital, Whitaker shall be permitted to enter the next class below that in which he was, and be entitled to a fair chance

of graduation. It is said that the President and Secretary of War are both of opinion that it will be better to have the trial take place at some other place than West Point, where, as experience has demonstrated, the influences are all opposed to allowing Whittaker a fair chance to defend himseif. The court | rior Court Judges, Bennett and Gilmartial will be ordered in a few days, mer, being sort of illegitimate appendand the Judge Advocate General will draw the charges and specifications for into the big majorities, getting respecthe trial of Whitaker.

GHTEUL RAILROAD ACCT

DENT. On Monday last a frightful accident seurred on the Air Line Railroad which runs from Charlotte to Atlanta. Georgia. The scene of accident was about 9 miles from Charlotte at Paw Creek treatle.

Two freight trains of the usual sign

left Charlotte yesterday morning in sections—that is, the one about fifteen minutes behind the other. On the up grade, just beyond Paw Creek trestle gin er Anthony, broke loose, land stopped after running only a short distance. In the rear car were the flag-man, Robert Griffith, of this city, and six passengers, three of whom colored. When the detached stopped, flagman Griffith jumped off, and, having told the train men to inform the passengers that they had broken loose from the remainder of the train, immediately started back to signal the second section, which he knew must be only, a few miles behind. He had not gone back far before he heard the engine of the approaching train whistle, and then realized the fact that he could proceed no further, because of the treatle, which is 150 yards wide and very high. He waved the flag as and very high. He waved the flag as the engine, in charge of Engineer Wisenberry, came in sight, and the engineer expressed his recognition of it by immediately blowing "on brakes." But his train was heavy, and he was nearing the bottom of one of the biggest grades on the road, hence it was impossible to stop. As soon as he saw this, and before crossing the trestle, he reversed his engine, and continued to blow "on brakes." He left his seat, and, standing in front of the fire-box, with his hand on the lever, awaited the shock. It came, and he was partially knocked down by a stick of wood from the tender, but was otherwise unhurt, the tender, but was otherwise unhurt, though almost entirely shut in by the mass of debris which was thrown against the engine. His life was probably saved by the fact that the rear of the tender was thrown to one side, thus

GARFIELD'S POLICY.

There are certain necessities which are the results of political canvassees which are successful. Great conven tions meet and formulate opinions and tabulate principles into concise and consequential statements, which may express the average opinions of a certain class of citizens. It is impossible that a uniformity of opinion shall be arrived at which is a dead level, an absolute inflexibility, a perfectly symetrical sameness, but there is a certain definite and distinct volume of thought that is always developed in the group ing around the platforms of a campaign. It is entirely unphilosophical to expect that the results of the submission to the people of a class of well defined principles, is not to be felt in the character of the officials who are educed from the legal processes provided for making a government out of

OCEAN CABLES, NEW AND OLD. Estimates for Laying two New Cables-How the Old Ones Have Lasted.

From the New York Tribune. Estimates for laying two new Atlantic cables, to be operated when laid in onnection with the land lines of the American Union Telegraph Company. have been received from Siemens & Co., the English Cable contractors .-They agree to complete the two cables for something less than £1,500,000 .-Their offer has not yet been accepted because the promoters of the new company are awaiting the receipt of estimates from Matthew Gray, of the Silverton Works. The announcement that a contract has been made for the new cables is premature. Siemens & Co. laid the new French cable within seven months from the date of the formation of the company, and it is expected that In about 1832 the government of the they would be able to complete the United States gave the Indian Terri- proposed cables in a still shorter period. FOR THE CURE OF

Hepatitis, or Liver Complaint,

DYSPERSIA AND SICE HEADACHE. Symptoms of a Diseased Liver.

DAIN in the right side, under the I edge of the ribs, increases on pressure; sometimes the pain is in the left side; the patient is rarely able to lie on the left side; sometimes the pain is felt under the shoulder blade, and it frequently extends to the top of the shoulder, and is sometimes mistaken for rheumatism in the arm. The stomach is affected with loss of appetite and sickness; the bowels in general are costive, sometimes alternative with lax; the head is troubled with pain, accompanied with a dull, heavy sensation in the back part. There is generally a considerable loss of memory, accompanied with a painful sensation of having left undone something which ought to have been done. A slight, dry cough is sometimes an attendant. The patient complains of weariness and debility; he is easily startled, his feet are cold or burning, and he complains of a prickly sensation of the skin; his spirits are low; and although he is satisfied that exercise would be beneficial to him, yet he can scarcely summon up fortitude enough to try it. In fact, he distrusts every remedy. Several of the above symptoms attend the disease, but eases have occurred where few of them existed, yet examination of the body, after death, has shown the Liver to have been extensively deranged. sively deranged.

AGUE AND FEVER.

DR. C. McLANE'S LIVER PILLS, IN DR. C. MCLANE'S LIVER PILLS, IN CASES OF AGUE AND FEVER, when taken with Quinine, are productive of the most happy results. SUNDAY MORNING, JAN. 2, 1881.

A PAYING OCCUPATION. The approach of the long winter eyenings calls attention to the matter of a lamp, for without a good light have the pleasure or profit is taken from Low Middling, reading or study. Coal oil is new in Middling, Good Middling, Good Middling, outside of cities or large towns where coal gas is used, and when a proper lamp is used it is the best substitute for sunlight yet discovered. The principle or plan upon which the Student Lamp is constructed may be said to be the best in use, but the lamp itself has always had several objectionable features which we are glad to see are being done away with in the new aspirant for favor called the "HOME LAMP," manufactured by the Home Lamp Co. ot Cincinnati. The great objection to most other lamps is their liability to be upset, the trouble to keep them in order, and the poor light given by them. The New Home Lamp is Nickel Plated, and almost a fac-similie of the Student Lamp; it has a handsome ornamented clamp by means of which the lamp can be at once easily adjusted in any position upon the center table, piano, music rest, sewing machine, desk, or by means of a bandsome bracket/ which goes with

feature of excellence, but the New if one Lamp combines also the patent good bucker, a filling indicator and Middling, Good Middling. matel box. No lamp has ever before been received with such universal favor or received such strong recommendations from the leading journals of Cincinnati. It is also endorsed by such men as the mayor and postmaste., several insurance presidents and express agents of that city as the safest, most convenient and best lamp made. The Company desires agents in this locality, and any smart lady or gentleman can make a handsome income during the next six months by canvassing for its gallon the last sale being 43} cents, at sale. There is hardly a dozen families In this county who will not want one, and its price is so low as to bring it within the reach of all. VERMIFUGE.

SYMPTOMS OF WORMS.

THE countenance is pale and leadn-colored, with occasional flushes, or a circumscribed spot on one or both cheeks; the eyes become dull; the pupils dilate; an azure semicircle runs along the lower eye-lid; the nose is irritated, swells, and sometimes bleeds; a swelling of the upper lip; occasional headache, with humming or throbbing of the ears; an unusual secretion of saliva; slimy or furred tongue; breath very foul, particularly in the morning; appetite variable, sometimes voracious, with a gnawing sensation of the stomach, at others, entirely gone; fleeting pains in the stomach; occasional nausea and vomiting; violent pains throughout the abdomen; bowels irregular, at times costive; stools slimy, not unfrequent-ly tinged with blood; belly swollen and hard; urine turbid; respiration occasionally difficult, and accompanied by hiccough; cough sometimes dry and convulsive; uneasy and disturbed sleep, with grinding of the teeth; temper variable, but generally irritable, &c.

Whenever the above symptoms are found to exist,

DR. C. McLANE'S VERMIFUGE will certainly effect a cure.

IT DOES NOT CONTAIN MERCURY in any form; it is an innocent preparation, not capable of doing the slightest injury to the most tender infant. The genuine Dr. McLane's VER-MIFUGE bears the signatures of C. McLANE and FLEMING BROS. on the

Ague Cure Is a purely vegetable bitter and powerful tonic, and is warranted a speedy and certain cure for Fever and Ague, Chills and Fever, Intermittent or Chill Fever, Remittent Fever, Dumb Ague, Periodical or Billious Fever, and all malarial disorders. In missmatic districts, the rapid pulse, coated tongue, thirst, lassitude, loss of appetite, pain in the back and loins, and coldness of the spine and extremities, are only premonitions of severer symptoms which terminate in the ague paroxysm, succeeded by high fever and profuse perspiration.

high fever and profuse perspiration.

It is a startling fact, that quinine, arsenie, and other poisonous minerals form the basis of most of the "Fever and Ague Preparations," "Specifics," "Syrups," and "Tonics," in the market. The preparations made from these mineral poisons, although they are palatable, and may break the chill, do not cure, but leave the malarial and their own drug poison in the system, producing quinism, dizziness, ringing in the ears, headache, vertigo, and other disorders more formidable than the disease they were intended to cure. Aven's Acur Com thoroughly eradicates these nextons poisons from the system, and always cures the severest cases. It contains no quinine, mineral, or any thing that could injure the most delicate patient; and its crowning excellence, above the cartellate to care, but that it leaves the tient; and its crowning excellent its certainty to cure, is that it is system as free from disease as b
